

§ 121.405

13 CFR Ch. I (1–1–07 Edition)

(3) For the purposes of contracts with durations of more than five years (including options), including Multiple Award Schedule (MAS) Contracts, Multiple Agency Contracts (MACs) and Government-wide Acquisition Contracts (GWACs), a contracting officer must request that a business concern re-certify its small business size status no more than 120 days prior to the end of the fifth year of the contract, and no more than 120 days prior to exercising any option thereafter. If the contractor certifies that it is other than small, the agency can no longer count the options or orders issued pursuant to the contract towards its small business prime contracting goals. The agency and the contractor must immediately revise all applicable Federal contract databases to reflect the new size status.

(i) A business concern that certified itself as other than small, either initially or prior to an option being exercised, may recertify itself as small for a subsequent option period if it meets the applicable size standard.

(ii) Re-certification does not change the terms and conditions of the contract. The limitations on subcontracting, non-manufacturer and subcontracting plan requirements in effect at the time of contract award remain in effect throughout the life of the contract.

(iii) A request for a size re-certification shall include the size standard in effect at the time of re-certification that corresponds to the NAICS code that that was initially assigned to the contract.

(iv) A contracting officer must assign a NAICS code and size standard to each order under a long-term contract. The NAICS code and size standard assigned to an order must correspond to a NAICS code and size standard assigned to the underlying long-term contract. A concern will be considered small for that order only if it certified itself as small under the same or lower size standard.

(v) Where the contracting officer explicitly requires concerns to recertify their size status in response to a solicitation for an order, SBA will determine size as of the date the concern submits its self-representation as part of its response to the solicitation for the order.

(vi) A Blanket Purchase Agreement (BPA) is not a contract. Goods and services are acquired under a BPA when an order is issued. Thus, a concern's size may not be determined based on its size at the time of a response to a solicitation for a BPA.

* * * * *

§ 121.405 May a business concern self-certify its small business size status?

(a) A concern must self-certify it is small under the size standard specified

in the solicitation, or as clarified, completed or supplied by SBA pursuant to § 121.402(d).

(b) A contracting officer may accept a concern's self-certification as true for the particular procurement involved in the absence of a written protest by other offerors or other credible information which causes the contracting officer or SBA to question the size of the concern.

(c) Procedures for protesting the self-certification of an offeror are set forth in §§ 121.1001 through 121.1009.

§ 121.406 How does a small business concern qualify to provide manufactured products under small business set-aside or 8(a) contracts?

(a) *General.* In order to qualify as a small business concern for a small business set-aside or 8(a) contract to provide manufactured products, an offeror must either:

(1) Be the manufacturer of the end item being procured (and the end item must be manufactured or produced in the United States); or

(2) Comply with the requirements of paragraph (b), (c) or (d) of this section as a nonmanufacturer, a kit assembler or a supplier under Simplified Acquisition Procedures.

(b) *Nonmanufacturers.* (1) A concern may qualify for a requirement to provide manufactured products as a non-manufacturer if it:

(i) Does not exceed 500 employees;

(ii) Is primarily engaged in the retail or wholesale trade and normally sells the type of item being supplied; and

(iii) Will supply the end item of a small business manufacturer or processor made in the United States, or obtains a waiver of such requirement pursuant to paragraph (b)(3) of this section.

(2) For size purposes, there can be only one manufacturer of the end item being acquired. The manufacturer is the concern which, with its own facilities, performs the primary activities in transforming inorganic or organic substances, including the assembly of parts and components, into the end item being acquired. The end item must possess characteristics which, as a result of mechanical, chemical or human action, it did not possess before
